Tutorial 4

TOTAL POINTS 7

1. These questions come from the Django project tutorial materials.

1 / 1 point

What is stored in the variable `request.POST`?

- ☐ The code that runs after a view method is complete
- ☐ The next page to redirect the browser to after the processing is complete
- ☐ The name of the model to store an extra copy of the incoming data
- ☒ A dictionary-like object that lets you access submitted POST data

Correct

2. What does the `django.urls.reverse()` function do?

1 / 1 point

- ☒ It constructs the path to a view using the name of a path entry in `urls.py`
- ☐ It sends the POST data back to the browser if there is an error
- ☐ It sends a 404 error if the record cannot be loaded
- ☐ It reverses the order of the characters in a string

Correct

3. What happens if you access a detail view like `results()` in Django tutorial 4 and provide a key that does not exist on the URL?

1 / 1 point

- ☐ The record is automatically created but left empty
- ☐ You get a 200
- ☐ The server crashes and sends you a 500
- ☒ You get a 404

Correct

4. In the `polls/templates/polls/detail.html` file in Django tutorial 4, what happens if you leave out the `csrf_token` line in the form?

1 / 1 point

- ☐ The favicon will not show up properly in the title bar
- ☐ The form will look strange in the user's browser
- ☒ The POST data will be blocked by the server
- ☐ The server will not know which object to retrieve once the POST data is sent

Correct

5. In the `polls/templates/polls/detail.html` file in Django tutorial 4, which bit of code tells the view that will receive the POST data which question to associate this vote with?

1 / 1 point

- ☐ `choice.choice_text`
- ☐ `question.question_text`

- ☐ forloop.counter
- ☒ url 'polls:vote' question.id

✓ Correct

6. Which HTTP method is used when sending data to the server that will modify or update data?

1 / 1 point

- ☐ GET
- ☐ 200
- ☒ POST
- ☐ 404

✓ Correct

7. What does the Django template filter "pluralize" do?

1 / 1 point

- ☒ It emits an 's' if the value is > 1
- ☐ It splits a string using a specific delimiter character
- ☐ It converts a word to the plural form depending on the user's selected language
- ☐ It returns a random item from the given list

✓ Correct
