# Templates and Views

**TOTAL POINTS 8**

1. What does the built-in Django template tag "lorem" do?    `1 / 1 point`

   ○ Displays the overall number of learning objects

   ○ Returns true if there are learning objects on the page

   ○ Displays the number of remaining learning objects

   ◉ Displays random "lorem ipsum" Latin text

   ✓ **Correct**

2. What does the built-in Django template tag "spaceless" do?    `1 / 1 point`

   ◉ Removes whitespace between HTML tags

   ○ Shows data with a dark blue background and white text

   ○ Returns true if the text will fit in a smaller space

   ○ Uses a smaller font so text fits into the available space

   ✓ **Correct**

3. What does the built-in Django template tag "url" do?    `1 / 1 point`

   ○ Checks if the provided string is a valid URL

   ○ Emits an anchor (a) tag in the HTML

   ○ Encodes the provided string using the URL encoding rules

   ◉ Returns an absolute path reference matching a given view and optional parameters

   ✓ **Correct**

4. What built-in Django template filter capitalizes the first character of the value?    `1 / 1 point`

   ◉ capfirst

   ○ toUCFirst

   ○ toupper

   ○ ucfirst

   ✓ **Correct**

5. What does the built-in Django template filter "length" do?    `1 / 1 point`

   ○ Returns the number of characters produced by the template up to this point

   ○ Returns the length of a string but not the length of a list

   ○ Returns the length of a list but not the length of a string

   ○ Returns the number of words in a string

   ◉ Returns the length of a list or string

○ Returns the length of a list or string

✓ **Correct**

6. What does the built-in Django template filter "safe" do?  `1 / 1 point`

⦿ Marks a string as not requiring further HTML escaping prior to output

○ Exits the template processing and ignores the rest of the template

○ Locks the next HTML tag so it cannot be modified in a browser debugger

○ Marks a string as requiring HTML escaping prior to output

✓ **Correct**

7. Looking at the Django built-in template and filter documentation, the author seems to have a pet named "Joel". What kind  `1 / 1 point`
   of animal is their pet?

○ A dog

⦿ A slug

○ A cat

○ A bearded gecko

✓ **Correct**

8. What does the Django built-in template tag forloop.counter represent in a Django template?  `1 / 1 point`

○ The number of iterations from the end of the loop (0-indexed)

○ The current iteration of the loop (0-indexed)

⦿ The current iteration of the loop (1-indexed)

○ The number of iterations from the end of the loop (1-indexed)

✓ **Correct**
